

The Condition of College and Career Readiness

This report looks at the progress of the 2016 ACT®-tested graduating class relative to college and career readiness.

This year's report shows that **64%** of students in the 2016 US graduating class took the ACT test, up from 59% in 2015 and 49% in 2011. The increased number of test takers over the past several years enhances the breadth and depth of the data pool, providing a comprehensive picture of the current graduating class in the context of college readiness, as well as offering a glimpse at the emerging educational pipeline.

As a research-based nonprofit organization, ACT is committed to providing information and solutions to support the following:

- **Holistic view of readiness.** The 2014 ACT report, *Broadening the Definition of College and Career Readiness: A Holistic Approach*, shows academic readiness is only one of four critical domains in determining an individual's readiness for success in college and career. Cross-cutting capabilities, behavioral skills, and the ability to navigate future pathways are also important factors to measure and address. Together, these elements define a clear picture of student readiness for postsecondary education.
- **Providing meaningful data for better decisions.** ACT is focused on providing better data to students, parents, schools, districts, and states so that all can make more informed decisions to improve outcomes. We accomplish this goal by taking a holistic view and using consistent and reliable historical information so that individuals and institutions have a better context to make critical decisions about the journey they have undertaken.

The Condition of College & Career Readiness 2016

New Mexico Key Findings

Performance

- In New Mexico, 13,435 students from the 2016 graduating class took the ACT. This is a slight increase of 42 students from 13,393 in 2015.
- The 2016 New Mexico graduating class results reflect a change in overall percentage of students meeting the ACT College Readiness Benchmarks across all content areas as follows:
 - ~ 53% met the English Benchmark; decrease from 55% in 2015
 - ~ 31% met the mathematics Benchmark; decrease from 33% in 2015
 - ~ 39% met the reading Benchmark; decrease from 40% in 2015
 - ~ 28% met the science Benchmark; decrease from 30% in 2015
 - ~ 19% met all four ACT College Readiness Benchmarks; decrease from 20% in 2015
- Relative to ACT Composite score and subject level scores, New Mexico saw the following:
 - ~ The average Composite score decreased by 0.2 from 2015, but reflects the same score of 19.9 from 2012–14.
 - ~ New Mexico Hispanic/Latino graduates outperformed their national counterparts by 0.1 in their ACT Composite average of 18.8 vs. 18.7 nationally.
 - ~ New Mexico White students outperformed their national counterparts by 0.4 in their ACT Composite average of 22.6 vs. 22.2 nationally.
- Numbers of students and average ACT scores by common course patterns
 - ~ 10,153 students reported taking four years of English and had an average ACT English score of 18.8.
 - ~ 8,625 students reported taking at least four years of social science and had an average ACT reading score of 21.0.

STEM

- 5,734 students reported taking four years of science (general science, biology, chemistry, and physics) and had an average ACT science score of 20.8.
- New Mexico graduates who took advanced science and math courses show higher levels of achievement:
 - ~ Students who reported taking biology, chemistry, and physics earned significantly higher average ACT science scores than those students who reported taking general science, biology, and chemistry.
 - ~ Students who reported taking Algebra 1, Algebra 2, geometry, trigonometry, and calculus scored significantly higher than those students who did not.
- STEM
 - ~ The average ACT STEM score is 20.0, compared to the national score of 20.9.

Complex Texts

- Proficiency in understanding complex texts:
 - ~ 34% of New Mexico students (4,525) achieved a level of Proficient and above
 - ~ 48% of New Mexico students (6,435) achieved a level of Below Proficient.

Career Readiness

- This year, for the first time, ACT has provided an indicator of career readiness based on ACT composite scores. Table 3.4 in the state ACT Profile Report details how ACT-tested New Mexico graduates are progressing toward the ACT National Career Readiness Certificate™ (ACT NCRC®).
- Progress toward career readiness is based on research linking ACT Composite scores to ACT NCRC levels. The ACT Composite cut score for each ACT NCRC level corresponds to a 50% chance of obtaining that level. If a student's ACT Composite score surpassed the cut score for an ACT NCRC level, they are categorized as making progress towards the next higher ACT NCRC level. Attainment of ACT NCRC levels indicates workplace employability skills that are critical to job success.
- In New Mexico, 63% of ACT tested graduates are considered making progress towards at least a gold ACT NCRC level. This compares to 68% nationally.

Behaviors that Impact Access and Opportunity

- Testing patterns
 - ~ The percent of New Mexico ACT-tested graduates who took the exam only one time, 47.5%, is lower than the national rate of 57%.
 - ~ In New Mexico, students who took the ACT beginning in grade 11 and took it again increased their average composite score by 0.9 points.
 - ~ Since 2012, Hispanic/Latino students have been the testing majority even as their composite score remained consistent.
- Below are the top five colleges and universities to which New Mexico graduates sent their ACT scores:
 1. University of New Mexico
 2. New Mexico State University
 3. Eastern New Mexico University
 4. Central New Mexico Community College
 5. Arizona State University
- The ACT Educational Opportunity Service (EOS) opt-in rates
 - ~ EOS is a free service that allows students to learn about educational, scholarship, career, and financial aid opportunities from colleges, universities, financial aid and scholarship agencies, and other organizations that offer educational programs. 85.3% of New Mexico students who registered for the ACT opted to participate in EOS, compared to 73.1% nationally.
- Get Your Name in the Game™ information
 - ~ The “Get Your Name in the Game” campaign provides underserved students with opportunities to find colleges that would be a good fit and helps them realize that postsecondary education is attainable. San Juan College and the University of New Mexico accessed 8,641 student names using this initiative.
- Fee Waiver Usage
 - ~ In New Mexico, there were 11,116 fee waivers issued and 8,679 of those were used. This equates to a 78.1% usage rate. The national rate was 74.5%.
 - ~ ACT provides students fee waivers to provide more access and opportunity for students.

Pipeline

- The top five planned educational majors reported by the 2016 New Mexico graduating class are:
 - ~ Health Sciences and Technologies—2,690; average Composite score of 19.6
 - ~ Engineering—1,328; average Composite score of 21.9
 - ~ Social Sciences and Law—1,180; average Composite score of 19.7
 - ~ Business—1,034; average Composite score of 19.2
 - ~ Arts: Visual and Performing—876; average Composite score of 20.0
- 2,048 students reported “Undecided” as their planned educational major. These students have an average Composite score of 19.8.
- 9,006 New Mexico students aspire to earn an associate’s, bachelor’s, and/or graduate degree.

ACT Footprint

ACT Aspire® Summative	ACT Aspire® Periodic	ACT Engage®	ACT QualityCore®	PreACT™	ACT WorkKeys®

* PreACT refers to preorders for FY17.

These are the number of each of these assessments delivered in the state and not reflective of the 2016 ACT-tested graduating class.

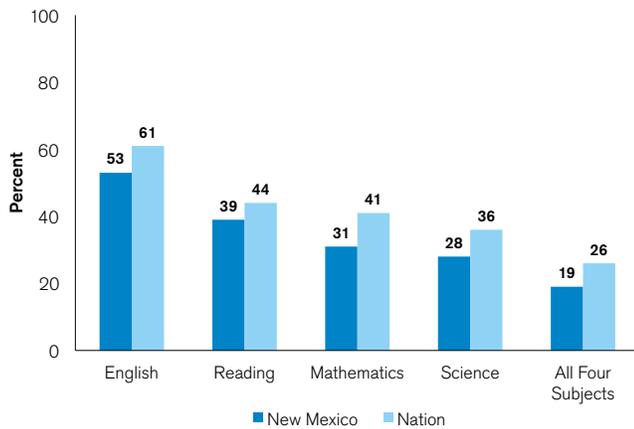

ACT Partnerships in New Mexico

- Gear Up New Mexico (12 high schools)
- New Mexico Department of Workforce Solutions providing ACT WorkKeys/CR 101 and ACT NCRC
- Other partnerships in support of ACT WorkKeys/CR 101 and ACT NCRC:
 - ~ Cesar Chavez Community School
 - ~ Innovate/Educate
 - ~ New Mexico Junior College
 - ~ New Mexico State University Carlsbad
 - ~ Roswell Job Corps Center
 - ~ San Juan College
- ACT conducted three College and Career Readiness Workshops in New Mexico:
 - ~ Albuquerque, Farmington, and Santa Fe

Percent of 2012–2016 ACT-Tested High School Graduates Meeting ACT College Readiness Benchmarks*

Note: Percents in this report may not sum to 100% due to rounding.

* ACT College Readiness Benchmarks in reading and science were revised in 2013.

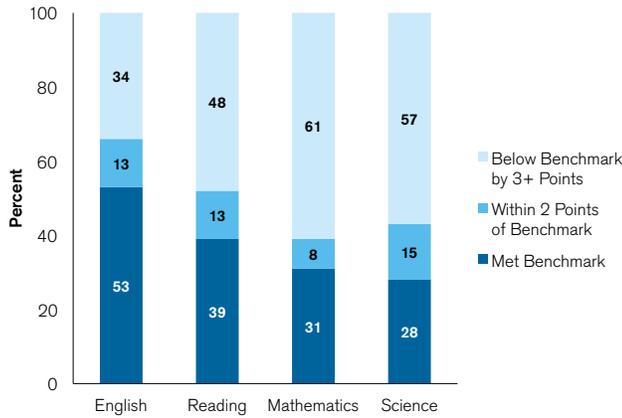

Student Data Trends

- Between 2012 and 2016, the number of students taking the ACT in New Mexico decreased by 2.6%.

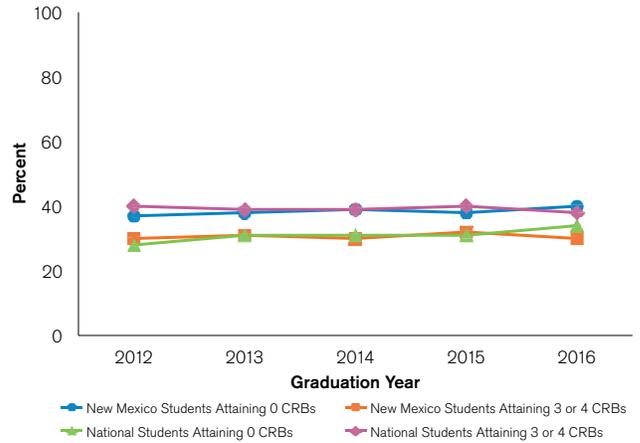

Student Condition Data Interest Trends: 2012–2016, State vs. Nation

Percent of 2012–2016 ACT-Tested High School Graduates by Race/Ethnicity

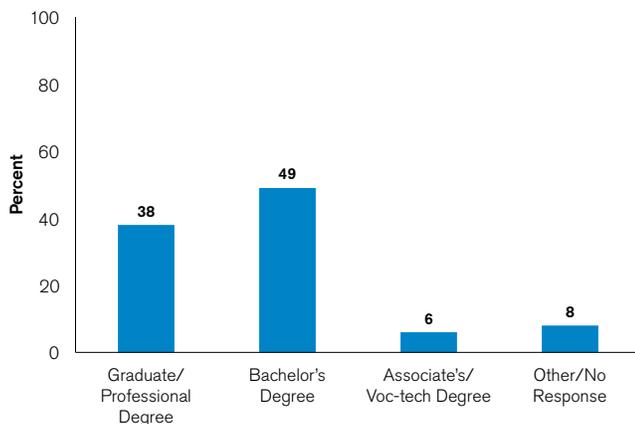

Percent of 2012–2016 ACT-Tested High School Graduates Meeting Three or More Benchmarks by Race/Ethnicity

Note: Values less than 0.5% will not appear.

Percent of 2016 ACT-Tested High School Graduates by Educational Aspirations

There is good news in that 92% of New Mexico's 2016 ACT-tested graduates aspired to postsecondary education. Interestingly enough, 93% of New Mexico's 2015 ACT-tested graduating class aspired to enroll in postsecondary education, compared to 69% who actually did enroll. If we fully closed the aspirational gap, an additional 3,101 of the 2015 ACT-tested graduates from New Mexico would have enrolled in postsecondary education.

What You Need to Know

At ACT, we are inspired every day to make a positive difference. Here are a few ways we are making an impact each day in the lives of students, teachers, education, policy makers, and workforce leaders.

The ACT®

- Enhancements to ACT Score Reports starting in September 2016
- Introduction of ACT Kaplan Online Prep Live in September 2016
- New Score Reports

Pre-ACT™

- Affordable cost—\$12 per student tested for schools, districts, and states
- Flexible administration—Schools, districts, and/or states may administer on any date between September 1, 2016 and June 1, 2017
- Structured test environment—Similar to what the student will experience when taking the ACT test

Online Prep Live

ACT® KAPLAN

- A virtual classroom experience that delivers all the benefits of ACT Online Prep, plus an interactive teaching experience
- Live learning experiences available at no cost to students who register for the ACT using a fee waiver
- Recorded sessions available on demand to provide maximum flexibility to students

ACT® Aspire®

- New Performance Level Descriptors coming in August 2016
- More than 5 million ACT Aspire online assessments administered to US students since January 2016, a major milestone for the program and up by more than 130% compared to the previous year
- New Score Reports

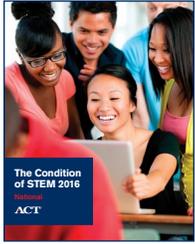

ACT® Engage®

- Helps schools face the challenge of preparing students for success after high school. Read the latest white paper, *Identifying Skills to Succeed in School, at Work, and in the "Real World."*
- New Score Reports

ACT® WorkKeys®

- Updated versions of the ACT National Career Readiness Certificate (ACT NCRC) assessments and credential coming in summer 2017
- Fully updated ACT WorkKeys curriculum and test prep available in summer 2017 to support the updated ACT NCRC assessments
- Will include a new test delivery platform that will introduce features and functionality important to ACT WorkKeys customers

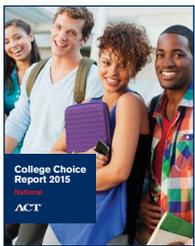

Key ACT Research

The Condition of STEM 2016— Releasing November 2016

This report provides national and state data about the 2016 graduating class in

the context of STEM-related fields (Science, Technology, Engineering, Mathematics) to determine student interest levels in specific STEM fields and, more importantly, readiness in math and science of those interested in STEM careers.

College Choice Report 2015

This report follows the ACT-tested high school graduating class of 2015, focusing on specific testing behaviors that

may expand college opportunities available to students. This is an important topic for enrollment managers and admissions officers to consider, as students' participation in these testing behaviors have implications for colleges' chances to recruit, advise, and place these prospective students.

Recommendations

1. Create an assessment model that measures a variety of skill domains and competencies required for college and career success.

Historically, college and career readiness assessments have focused only on academic skills. ACT research has clearly established areas of competency important for college and career readiness success. While our research shows that ACT solutions independently measure key components of college AND career readiness, we and others have begun to realize that no single solution can measure the full breadth of this readiness, nor should it. Simply put, the ACT alone is not enough to measure the full breadth of career readiness. A more holistic assessment model, incorporating multiple domains and specific skills associated with career clusters or occupations, will typically be most appropriate for describing and evaluating student readiness for college and career.

2. Optimize opportunities to influence awareness and engagement of underserved learners.

Initiatives designed to aid underserved learners are only as effective as they are visible. We must inform advocates and ALL underserved learners about the available and effective programs designed for this purpose. For example, in the 2015–2016 academic year, approximately 730,000 students registered to take the ACT using fee waivers valued at more than \$36 million. Yet, not all eligible students took advantage of this offer. Similarly, institutions must use data to inform intervention strategies if they are going to help underserved students be prepared for postsecondary success.

3. Take the guesswork out of STEM.

It is critically important to align STEM initiatives to capitalize on performance, measured interest, and expressed interest. Essential to this effort is expanding and nurturing interest in STEM, which will impact the emerging pipeline of STEM majors, teachers, and workers. This requires capturing a wider range of students and employing concrete measures to inform intervention and programming. To do so, states and districts must look for partnering opportunities from K–12 to postsecondary education to the workplace.

4. Focus on the implementation of fewer, higher, clearer, standards in K–12 classrooms to raise the bar for all students.

No matter the adopted standards, proper implementation must focus on the most critical component for increasing readiness—effective, high-quality teaching. This requires investment in postsecondary teaching programs, professional development, and state-level collaboration among K–12 and higher education.

5. Don't over test students.

When states, schools, and districts build an assessment strategy that recognizes the limits and promise of test scores, they will reduce the likelihood of over testing. Used ethically and appropriately, assessments can inform decisions at individual and institutional levels. Misunderstood, misused, or abused, assessments cause confusion, can be perceived as punitive, or result in ill-conceived strategies. To quote ACT founder E.F. Lindquist, "Assessment is valuable to the extent it bridges teaching and learning."
